

# EWS DATA PORTAL

## Overview:

EWS's Custom Data Portal, leverages the power and reliability of our extensive cellular and Iridium Switch datalogger family to deliver a cost-effective, self-contained package to monitor all of your remote sites from the comfort of your office.

## Features:

The EWS Data Portal comes with the following benefits:

- Mobile or Satellite communications from the field straight to your computer/laptop for real time monitoring
- Infrastructure is stored in Rackspace Sydney Data Center with SQL server back ups
- Simple layout for ease of operation
- Custom Graphs
- Alarms can be setup based on high/low or thresholds
- Custom web design available
- FTP/SFTP/Email data to any client database at any interval
- Works on tablet or mobile
- All sites on one easy to view page
- Change logging and Transmission times from your office
- Limit interaction with SME
- Removes staff from the field mitigating risk
- 24/7 technical support
- Email data and graphs with one click
- Alarms at no extra cost to alert when sites are on/off
